

SUMMARY

AI Engineer, data professional, and Software Engineer experienced in **data engineering, data management, and BI reporting**, with a strong background in **Microsoft Power BI** and **Power Apps**. Developed multiple applications for government projects for **NIH, FAA, and Maryland Judiciary**, focusing on data organization, ETL processes, automation, and visualization. Skilled in improving data processes to support informed decision-making.

TECHNICAL SKILLS

- **AI Tools & Frameworks:** RAG, LangChain, Cursor AI, Claude Code, OpenAI Codex, Vapi AI, Manus, n8n, Google Studio AI
- **Programming Languages:** Python, DAX, SQL, TypeScript, React, JavaScript, R
- **Business Intelligence:** Microsoft Power BI, Tableau, Google Looker Studio, Paginated Report Builder
- **Platforms & Tools:** Microsoft Power Apps, Power Automate, Dataverse, Azure DevOps, SharePoint, Oracle APEX, Google Ads, Meta Ads, Amazon Ads, Vercel, Twilio
- **Databases:** Microsoft Dataverse, SQL Server, MySQL, SQLite, PostgreSQL, Pinecone
- **Cloud/OS:** AWS Console, Windows, Linux, Mac

PROFESSIONAL EXPERIENCE

AI Engineer Intern | Ark Infotech LLC, MD

June 2026 - August 2026

- **AI Orchestration & Architecture:** Assisted in architecting the backend blueprint to integrate communication platforms into a single automated system.
- **Multilingual Voice AI:** Built and configured a trilingual **voice AI agent** (English, Russian, and Georgian) using Twilio and Retell to automate inbound call handling and appointment scheduling.
- **Chatbot Development:** Developed a website **RAG-based chatbot** for lead capture and designed routing logic for incoming client inquiries.
- **Systems Architecture & Deployment:** Packaged the Maryland Judiciary Operational Plan into a portable Power Platform solution.
- **Infrastructure Automation:** Automated complex SharePoint database replication using PnP PowerShell and XML blueprints.
- **Technical Documentation:** Authored comprehensive Operations Plans and GitHub repositories for standalone nationwide deployment.
- **Designed the database relationship model** to connect a new **Vector Database** and define the single source of truth for 5,000+ client records.

AI Data Analyst | Dementia Aide, CA

October 2025 - May 2026

- Analyzed multi-year **e-commerce datasets** in Python to identify search trends, optimizing revenue and key metrics by 70%.
- Automated CSV categorization Workflows using **Vibe coding** and **Cursor AI**, processing 26,000+ keywords and saving **15+ manual hours**.
- Developed **Power BI dashboards** for ad performance and demographics to accelerate internal decision-making.
- Evaluated **20+ multi-channel campaigns** to formulate strategies, increasing conversions and optimizing **ROAS above 4.0**. Continuously adjusted cross-channel budget allocation for optimal spend.

Data Engineer | Microsoft Power Apps Developer | Ark Infotech LLC, MD

May 2023 – August 2024

- Developed **6 data applications** and Power BI/Paginated Reports for **NIH projects**, enabling data-driven stakeholder decisions.
- Designed and implemented **relational data models** in **Microsoft Dataverse**, improving data integrity and storage efficiency. Migrated and integrated legacy datasets from **SharePoint**, Excel, and Access into Dataverse.
- Developed Python-based **ETL and machine learning-assisted** workflows to flatten and structure complex government datasets into relational formats for Dataverse applications and reporting systems.
- Configured **Playwright MCP** setup to generate browser automation testing scripts, reducing manual testing time. Enhanced application functionality through **Power Automate workflows** for data-driven automation.

PROJECTS

RAG-Based Chatbot Portfolio

- Built a Next.js portfolio with a custom **RAG chatbot** (LangChain, Pinecone) to answer recruiter questions via real-time text queries.
- Engineered an **automated PDF ingestion pipeline** for semantic search, optimizing API costs and latency by limiting context retrieval.

EDUCATION

MS in Data Analytics Catholic University of America	September 2024 - May 2026
BS in Computer Engineering State University of New York (SUNY)	September 2021 - May 2023

CERTIFICATION

Microsoft Certified: Power Platform Developer Associate | Power Platform Fundamentals
